R M P™

RESTORE. MAINTAIN. PROTECT

R.M.P has been working with A-Glaze since 2002 to bring professional and reliable services to the Yachting, Automotive and Aviation industries.

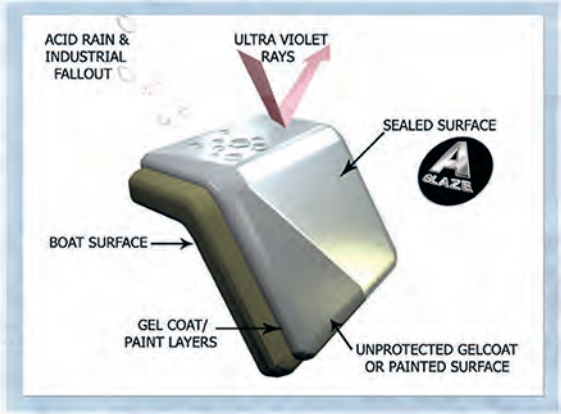
We are able to develop leading protective POLYMER coatings for all surfaces.

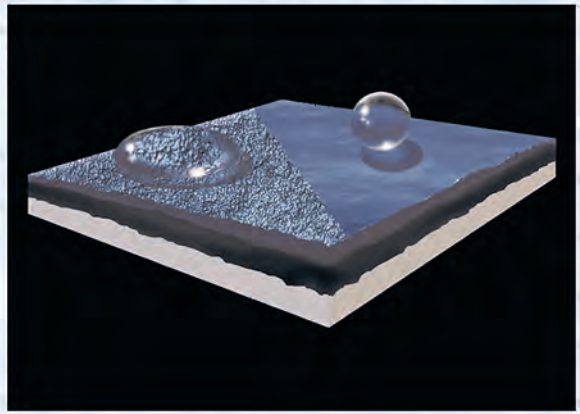
Paint Gel-coat Glass Stainless Steel Chrome Marble Metals

Leather Vinyl Fabric Air con purification

WORLDWIDE

- Improve and extend the life of new Paint and Gel-coat.
- Refurbish old Paint and Gel-coat.
- An environmentally friendly alternative to re-spraying.
- Improve and extend the life of Glass and Stainless steel.
- Protect against UV rays.
- Protect against exhaust staining.
- Protect against extreme temperatures.
- Protect against colour pigment deterioration.
- Protect against salt damage.
- Protect against ionisation and industrial pollution.
- Allow black streaks to be easily removed.
- Easliy removed requiring no harsh chemicals or excessive sanding which damages the top coat.





PAINT AND GEL-COAT

Our silicon free surface sealants are the only products with an 8-fluropolymer resin that bites into the surface to a depth of 5-7 microns to form a tough, crystal clear barrier which protects against extreme UV and heat exposure plus other environmental pollutants.

An environmentally friendly alternative to re-spraying. AGlaze will enhance even new paint with a higher gloss reading and longevity than thought possible. This product, being a Polymer,allows additional coats to be added as you wish enhancing your paint finish indefinitely. AGlaze will not yellow, crack or blister over time so will therefore never need to be removed from any surface it is applied too.

As far as we are aware, we are the only company to have approached top paint manufacturers to have them test our AGlaze product, our product will in no way harm any paint finish. Our product is guaranteed for 2 years on new paint.

The application process is clean and non-intrusive and if necessary can be applied in stages to suit you and the yachts schedule. The daily up keep of an AGlazed yacht is greatly reduced allowing your crew more time for the guests on board and the finer details.

RMP
RESTORE MAINTAIN PROTECT

PAINT

GEL-COAT

RMP have worked on many older yachts that were due for a respray and have proven time and again that this is a product that can delay this costly and time consuming process on a yearly basis.

Our polishing preparation on older paint or gel-coat is something we are very proud of. This is something we have mastered over the past 15 years.

We pride ourselves in getting the best possible finish prior to the application of the AGlaze sealant.

The product can also successfully restore and extend the life of coloured surfaces where fading is a major issue.

Being a product free from any silicon's or ceramics this is a sealant that is easily removed should an area need re-painting due to damage, corrosion etc. Any basic paint prep will remove the coating without the need for expensive excessive time consuming sanding.

"After the A-Glaze process, I would say that the overall colour on the gel-coat has been lifted by several shades and the boat now shines as new. This for a fraction of the cost of a new paint job."

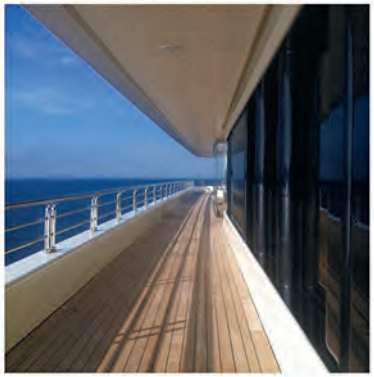
Capt M J Rutterford - M/Y Sirius

A GLAZE

GLASS

Our unique silicon-free A-Glaze glass sealant is a highly durable Carbon polymer, specially blended for RMP, that leaves a hydrophobic coating that has oil and water repellent properties while protecting against calcium and hard water. Glass becomes easy to clean and the life of the surface is greatly extended as the need for cleaning with vinegar or any other acid based cleaners is eliminated.

We guarantee this product for a minimum of 2 years, 3 years on the vast majority of yachts. We do however recommend this product is topped up biannually to ensure the protection continues to work at maximum efficiency. Captains and crews have mentioned to us that this system has reduced their workload by 90% and this in itself has been beneficial, let alone the fact that windows shine as new.



'Where to start with RMP? I first met David and Martin back in 2011 whilst working on board M/Y Fountainhead, the one with all the windows. They first came onboard to do a few sample pieces of our stainless and after 6 months we were totally sold on their A-Glazing product. Since then I've moved onto M/Y Anna, they came onboard to restore the windows to their former glory and then apply the A-Glazing on top. The result has been magic, the Glass looks brand new and the glazing on top offers great protection. It seems that whatever you need these guys can help you out, be it Windows interior or exterior, stainless or Paintwork they have the answer. We couldn't be happier with them as a company and the results that they achieve.'.
Many Thanks for the hard work guys.

Michael Sheen Chief Officer M/Y ANNA

STAINLESS STEEL

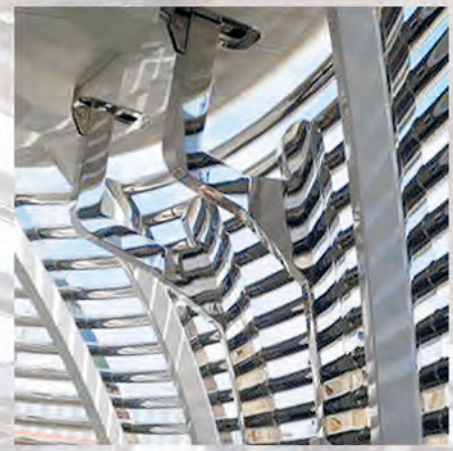
Our A-Glaze Stainless Steel polymer sealant when applied to polished or brushed stainless bonds to the surface to create a protective barrier that the dirt, salt and other pollutants rest on the surface of.

The maintenance of a sealed surface becomes a lot less time consuming without the need for chemical products or abrasive polishing to keep the area clean. A simple wipe over with a damp microfiber cloth will ensure the surface is clean, preventing the need for continual polishing.

Surfaces treated with A-Glaze Stainless Steel sealant are guaranteed for 1 year.

"We found your glass and stainless steel treament miraculous, as you know I'm a hands on captain on deck too and I would vouch for and thouroughly recommend any yacht which has plenty of glass and stainless steel structures to have your treatment"

Capt Jonathan Adeline - M/Y G-Force



MARBLE

R M P
RESTORE MAINTAIN PROTECT

Open-pore marble or stone surfaces react sensitively to fats, oils and other dirt deposits which easily penetrate the surfaces and leave clearly visible stains that cannot be removed even with intensive cleaning.

Our hydrophobic / oleophobic sealant was conceived in such a way that deposits of polutants are reduced to a minimum and damage from environmental influences are prevented. Dirt particles are easily removed without the need for abrasive cleaning solvents or machines. Due to it's inorganic network structure, the coating is extremely durable and is guaranteed for 1 year.

AUTO / AVIATION

As well as applying our products to Superyachts and Megayachts worldwide we also maintain and detail many high-end cars, helicopters and jets for our clients.

Our expert polishing process is something we really pride ourselves on and removes all cobwebbing, holograms and swirls from any paint finish. Add to this our AGlaze paint sealant and the car looks better than new. We also have treatments for the interior as well as the exterior.

A GLAZE

"It gives me great pleasure to write this recommendation for RMP Marine. Over the past 6 years I have used them on 5 different yachts (CAPRI, PHOENIX, MELANYA and AVANGARD II). Initially I used them to remove a nasty exhaust stain and after seeing the effects of their A-Glaze product on the hull and how well it lasted I was convinced that they had a serious product worth looking at closer.
I have had experience of their glass, stainless steel and paint products and can say that they are all superb. They have saved the crew valuable maintenance time and also saved the owner considerable amounts of money by greatly increasing the longevity of the paint work.
There great customer service and can do attitude makes them a pleasure to work with and I will continue to use them aboard LA FAMILIA and any further yachts."

Captain Mike Rouse, M/Y LA FAMILIA

The company R.M.P. Marine / A-Glaze were contacted to apply their product to the yacht's freshly applied paint to help prevent soot and contaminates impregnating the already impressive Awl Grip paint system. A test piece was conducted during the summer of 2004 with impressive results.
A-Glaze reduced the ingress of exhaust fumes within the paint and aided the cleaning process of the hull and super-structure.
The finished product once applied enhances any paint work and has aided Rahal's crew maintain the high standards this industry requires for its owner.

Captain Hamish Burr, M/Y RAHAL

"I have used RMP on my last 2 yachts and found them a pleasure to work with. They consistently complete any job we give them on time and within the budget, no questions asked. Both Dave and Martin are always willing to give free advice on how to take care of our yacht which is priceless with their years of experience. RMP are a very professional outfit with the utmost respect for the crew and yacht itself. I highly recommend RMP to anyone that wants to keep their yachts finish in A1 condition just as I do."

Jared Boshier. First Officer, M/Y SKY.

"We were very pleased with the overall result with the A-Glaze system. Mirabella's hull was no easy task, the paint was old and in a bad condition. However the A-Glaze gave it a new lease of life, repelling most of the dirt and grime that would normally have got absorbed into the paint work.
The after sales care was brilliant, far beyond what we might have expected. We had some problems around the exhaust area due to the age of our paint, but whenever we called up to get advice, they would always come down to the boat to sort it out and get it looking like a new again."

First Officer Will Robinson, M/Y Mirabella V

"I have used R.M.P. Marine / A-Glaze as a company for the past 6 years both on 'Kogo' and the owners previous yacht 'Tugatsu'.
I was introduced to A-Glaze whilst 'Tugatsu' was for sale and an area of paint around the topsides looked like it needed repainting due to exhaust damage. A-Glaze treated this area and I was amazed with the results.
We have had 'Kogo' repainted during the winter 2008/2009 and have had all the painted surfaces treated with A-Glaze and the results have been excellent with the deck crew spending less time on wash down. We also use the A-Glaze Glass product on all of our windows and this works very well."

Captain Grant Thompson, M/Y KOGO.

" The A Glaze team never fails to impress as does their products, they came on board recently and performed work on both the glass and the paint. Their professionalism and commitment to work was, as always great.
The product itself lends itself so well to yachts its difficult to see why all yachts are not using the A Glaze product. I continue to support their products 100/ and have absolutely no fears in recommending them to any Captain of any sized yacht"

Captain James R L Broughton, M/Y LADY ALLISON.

RMP

RESTORE. MAINTAIN. PROTECT

A-Glaze is suitable for use on all types of marine craft from personal watercraft, jet-skis, speedboats, luxury cruisers, super yachts and Mega Yachts - old and new. RMP gives a full guarantee on all work and products for at least one year, but for that deep shine that lasts we recommend that it be applied once a year to paint or gel-coat. The A-Glaze system uses the most up to date technology available to provide the best possible protection for your craft's surfaces.

Our business is built upon trust and integrity and a close relationship with all our customers. Captains and crew are on first name terms with us and as crews often move from boat to boat we feel it is essential that we build a good rapport.

At RMP we believe in a first class after sales service and we are never more than a phone call away.
